CONTENTS

OF THE

21st YEAR OF THE ENGLISH EDITION.

	PAGES	NUMBERS of the decimal classification.
No. 1. — JANUARY 1939.		
I. Train speeds and services in 1938, by Lionel WIENER	1	656. 222.1
II. Development of roller bearing axle boxes for railway vehicles, by F. PETERSEN	56	621. 135.2 & 625. 214
III. New York Central 4-6-4 locomotives show high power concentration	66	621. 132.3 (.73)
IV. The power boxes of the French Est Railways, by Mr. LECOMTE	77	656. 257 (.44)
V. MISCELLANEOUS INFORMATION :		
1. The N. R. self-adjusted brake, by V. NICOLET and R. ROUSSELET	96	621. 43 & 625. 251
2. Fractures of railcar axles, by Mr. CHATEL	100	625. 212
VI. NEW BOOKS AND PUBLICATIONS :		
The construction of the Irmak-Fylyos and Favzipasa-Diyarbekir railway lines.	104	625. 1 (.56)
VII. MONTHLY BIBLIOGRAPHY OF RAILWAYS	1	
No. 2. — FEBRUARY 1939.		
I. Railway curves. — Running over two tangent curves having the same superelevation, but different radii. Tolerance for the alignment of curves, by J. CHAPPELLET	105	625. 113
II. Reproducing the wearing qualities of early steel rails under modern conditions	110	625. 143.2 (.42)
III. The Sperry rail welding equipment	120	621. 392 (.73) & 625. 143.4 (.73)
IV. The metallisation of wooden-bodied bogie passenger coaches, by M. BERTRAND	126	625. 23 (.44)
V. The metallurgy of a high-speed locomotive. A survey of the materials used in the construction of the streamlined express engines of the L. M. S. R. with details of analyses and tests	135	621. 13 (.42) & 669 (.42)
VI. Testing machines for the measurement of the coefficients of friction of lubricants and anti-friction alloys, by I. HAGUENAUER	162	621. 133.2 & 625. 214
VII. Tests about the behaviour of railway vehicles on the track, by Ad.-M. HUG	177	625. 215
VIII. Frisco installs retarding barriers. Push-button cut-outs are provided for use during switching moves	194	625. 162 (.73) & 656. 259 (.73)
IX. Route interlocking on the Baltimore and Ohio Chicago Terminal	200	656. 257 (.73)
X. MISCELLANEOUS INFORMATION :		
1. Derailment on concrete roadbed caused by breaking bolts, Pere Marquette Railroad	205	625. 143.5 (.73) & 656. 281 (.73)
2. Electric switch heaters at Rock Island interlocking prove their value in severe snowstorm, by LEROY WYANT	207	625. 174 (.73) & 656. 259 (.73)
XI. MONTHLY BIBLIOGRAPHY OF RAILWAYS	15	

No. 3. — MARCH 1939.

	PAGES.	NUMBERS of the decimal classification.
I. Competition by roads, waterways and airways (<i>Continuation</i>). — Great Britain, 1938	211	656
II. The gain in power of streamlined locomotives, by Prof. Dr.-Ing. H. NORDMANN	216	621. 131
III. High-speed diesel-electric locomotives of the French National Railways Company, by Mr. TOURNEUR	230	621. 335 (.44) & 621. 43
IV. The weight factor in train resistance and its influence on the economic value of vehicles made of light-weight metals, by Fritz REIDEMEISTER	259	625. 2 & 656. 221
V. Fighting rail corrosion in the 6.21-mile Moffat tunnel, by W. C. JONES	269	62 (01 (.73) & 625. 143
VI. The friction of brake shoes at high speed and high pressure	278	625. 251
VII. Locomotive axle testing. — Results of fatigue tests on 11 1/2-in. unrolled and rolled axles	285	62 01 (.73) & 621. 135.2 (.73)
VIII. Route and approach locking, by Mr. LEMONNIER	291	656. 258
IX. MISCELLANEOUS INFORMATION :		
1. Four-cylinder compound 4-6-0 engines of the former French State Railways, rebuilt with external and internal streamlining and welded cylinders	300	621. 132.3 (.44) & 621. 392 (.44)
2. Results with Hudd system of automatic train control on the London Midland and Scottish Railway	303	656. 254 (.42)
3. Signal innovation in Germany. Wheel counting mechanism	309	625. 156 (.43) & 656. 259 (.43)
X. NEW BOOKS AND PUBLICATIONS :		
String lining of curves, by P. E. KNIGHT	311	625. 144.2
Failures of locomotive parts and how to prevent them, by Fred. H. WILLIAMS	312	62 (01 & 621. 13 (0
Wagon utilisation, by Howard E. PHEASANT	313	656. 223.2
American Signaling principles and practices. Chapter XXIV. — Power distribution systems and lightning protection. — Published by the AMERICAN ASSOCIATION OF RAILROADS, SIGNAL SECTION	313	656. 25 (.73)
XI. MONTHLY BIBLIOGRAPHY OF RAILWAYS	33	

No. 4. — APRIL 1939.

I. How should the problems of simplifying the working be considered in the future, in the interests both of the public and of the railways? (Question II, Enlarged Meeting of the Permanent Commission, July, 1939). — Report (<i>English speaking Countries and Belgium</i>), by E. DESORGER	315	656. 2
II. Railway curves. — A new method of dealing with track adjustments, solely by the aid of the versines diagrams, by J. CHAPPELLET	331	625. 113
III. P. L. M. Pacific locomotives, classes 231-G, 231-H and 231-K. Trials carried out and results obtained, by A. PARMANTIER	315	621. 131.3 (.44) & 621. 132.3 (.44)
IV. Increasing the adhesive weight of railcars, by J. L. KOFFMANN	382	621. 43
V. The new producer-gas railcars of the French National Railways Company, by Henry MARTIN	385	621. 4 (.44)
VI. Double-wire signalling, Victorian Government Railways	390	656. 257 (.945)
VII. Building above steam operation presents problems	394	62 (01 & 721. 1 (.73)

N° 4. — APRIL 1939 (continued).

III. MISCELLANEOUS INFORMATION :

1. The **maintenance of line and surface** to meet present-day operating requirements
2. **Fluorescent lighting for cars** on the New York Central Railroad . . .

PAGES.	NUMBERS of the decimal classification.	

403	625. 17 (.73)
408	625. 233 (.73)

IX. NEW BOOKS AND PUBLICATIONS :

- Die ortsfesten Anlagen elektrischer Bahnen** (*The fixed equipment of electric railways*), by Karl SACHS
- Description of the method of **locomotive repair** as carried out in the Khargpur Workshops of the Bengal Nagpur Railway, by L. G. BAILEY

411	621. 33 (02)
412	621. 138.5 (.54)

X. MONTHLY BIBLIOGRAPHY OF RAILWAYS

47

No. 5. — MAY 1939.

- I. **Methods used to speed up passenger trains** and the resulting expenditure. In particular, **operating by means of railcars**, and the financial results obtained by this method. — Report (*Great Britain, Dominions and Colonies, North and South America, China and Japan*), by T. W. ROYLE and F. E. HARRISON
- II. How should the problems of **simplifying the working** be considered in the future, in the interest both of the public and of the railways? — Report (*Secondary Railways*), by Dr. Gr. Uff. Pietro Lo BALBO
- III. **Coupled and twin railcars**, by Mr. TOURNEUR
- IV. A new **high-speed diesel-electric railcar set** for the Deutsche Reichsbahn
- V. **Silencing London's Tubes**, by John S. TREVOR
- VI. The **maintenance of movable bridges**.
- VII. Northern Pacific builds **turntables 135 ft. long**
- VIII. English 1000-B.H.P. vee-type **high-speed diesel engine** (Paxman Ricardo).
- IX. Davenport-Besler builds **105-ton diesel-electric switcher**

413	385. 114 & 656. 22
461	656. 2
467	621. 43 (.42)
473	621. 43 (.45)
475	62 (01 (.42) & 625. 4 (.42)
479	624. 8 (.73) & 625. 17 (.73)
488	625. 154 (.73)
492	621. 43 (.42)
498	621. 43 (.73)

X. MISCELLANEOUS INFORMATION :

1. **Pitting and corrosion in locomotive boilers**
2. The Brown-Boveri « Simplex » **bogie for electric traction**
3. A single-bank **horizontal engine** (Humboldt-Deutz) for **light railcar work**

503	62 (01 & 621. 133.7
506	625. 215 (.494)
510	621. 43 (.42)

XI. NEW BOOKS AND PUBLICATIONS :

- Leitgedanken der Eisenbahngütertarifpolitik mit Ausblicken auf die Tarifpolitik der Reichsbahn im Sächsischen Wirtschaftsgebiete** (*Guiding principles of the goods rates policy with special reference to the rates policy of the Reichsbahn in the industrial districts of Saxony*), by Dr. Walter SCHMIDT
- Die Eisenbahn ins Haus. Die Beförderung von Eisenbahnwagen und Schwerlasten mit Strassenfahrzeuge** (*Door-to-door rail transport. Transport of railway wagons and special heavy loads by means of road vehicles*), by Dr.-Ing. CULEMEYER
- Air resistance of railroad equipment**, by A. I. LIPETZ
- Chemins de fer — Agenda Dunod, 1939** (Railways — Dunod Pocket Book), 58th Edition, by P. PLACE

511	656. 235
511	656. 261
512	656. 221
513	385 (02

XII. MONTHLY BIBLIOGRAPHY OF RAILWAYS

No. 6. — JUNE 1939.

	PAGES.	NUMBERS of the decimal classification.
I. Methods used to speed up passenger trains and the resulting expenditure. In particular, operating by means of railcars, and the financial results obtained by this method. — Report (<i>Germany, Bulgaria, Denmark, Hun- gary, Norway, Sweden and Switzerland</i>), by HERRN ROHDE, STROEBE and FESSER	515	385. 114 & 656. 22
II. How should the problems of simplifying the working be considered in the future, in the interest both of the public and of the railways? — Report (<i>Continental Main-Line Railways, except Belgium</i>), by Mr. GOURSAT . . .	559	656. 2
III. Methods used to speed up passenger trains and the resulting expenditure. In particular, operating by means of railcars, and the financial results obtained by this method. — Report (<i>Belgium and Colony, France and Colonies, Greece, Italy, Luxemburg, Netherlands and Colonies, Portugal and Colonies, Rumania, Yugoslavia</i>), by L. DUMAS	569	385. 114 & 656. 22
IV. NEW BOOKS AND PUBLICATIONS: Handbuch für Kesselprüfer (<i>Handbook for the inspection of boilers</i>), by Specialists of the German State Railways	657	621. 133.3
Diesel Locomotives and Railcars (2nd Edition), by BRIAN REED	657	621. 431.72
V. MONTHLY BIBLIOGRAPHY	77	

No. 7. — JULY 1939.

I. Methods used to speed up passenger trains and the resulting expenditure. In particular, operating by means of railcars, and the financial results obtained by this method. — Special report, by L. DUMAS	659	385. 114 & 656. 22
II. How should the problems of simplifying the working be considered in the future, in the interest both of the public and of the railways? — Special report, by E. DESORGER	669	656. 2
III. Tickets, by Lionel WIENER. — Part E: Ticket representation of tariffs. Special tickets (<i>to be continued</i>)	673	656. 234
IV. British Railways' « Square Deal » Claims. The problem and its solution .	735	385. 14 (.42)
V. New coaches for electric traction on the Netherlands Railways, by E. BOLLEMAN-KYLSTRA	739	621. 338 (.492)
VI. Automatic apparatus for protecting level crossings, giving a constant warning interval independent of the speed of the train	748	625. 162 & 656. 254
VII. OBITUARY: Clément Colson	755	385 (092)
VIII. MONTHLY BIBLIOGRAPHY OF RAILWAYS	93	

No. 8. — AUGUST 1939.

I. Light-weight electric trains, classes BCFZe 4/6 and CFZe 2/6, of the Bernese Alps Railway Company (Bern-Loetschberg-Simplon), by L. LEYVRAZ	757	621. 335 (.494) & 621. 338 (.494)
II. Experimental railcar for the Central Railway of Peru, by J. L. KOFFMANN .	781	621. 431.72 (.85) & 621. 434 (.85)
III. The use of hydronalium for railcar construction, by OTTO TASCHINGER . .	797	621. 43 & 669

N° 8. — AUGUST 1939 (continued).

	PAGES.	NUMBERS of the decimal classification.
IV. Steel or wood sleepers? by Oberbaurat LEONHARD	816	621. 132.3 (.73)
V. Primary stresses in railway tracks, by W. E. GELSON	826	625. 14 (01)
VI. 4-6-4 type streamline passenger locomotives with welded fireboxes, Chicago, Milwaukee, St. Paul and Pacific Railroad	836	621. 132.5 (.73)
VII. OFFICIAL INFORMATION ISSUED BY THE PERMANENT COMMISSION OF THE INTERNATIONAL RAILWAY CONGRESS ASSOCIATION: Summaries adopted by the Enlarged Meeting of the Permanent Commission (Brussels, 6-9 July 1938) in connection with the two questions of present interest brought up for discussion: — Speeding up of passenger services — Simplifying the working	846	385 (06.111)
III. MISCELLANEOUS INFORMATION:		
1. German State Railways' 2-8-2 superheated steam locomotives, Class 41, for express goods traffic	852	621. 132.5 (.43)
2. New 4-8-2 type locomotives of classes 15 E, 15 F and 23, South African Railways	855	621. 132.3 (.68) & 621. 132.5 (.68)
IX. NEW BOOKS AND PUBLICATIONS:		
The Universal Directory of Railway Officials and Railway Year Book, 1939-1940	860	385 (02)
Elsners Taschen-Jahrbuch für den bautechnischen Eisenbahndienst (Elsner's Yearly Handbook for the Permanent Way Department), 1939 (17th year)	860	625. 1 (02)
Elsners Taschen-Jahrbuch für den Werkstätten- und Betriebsmaschinen-dienst bei der Deutschen Reichsbahn (Elsner's Yearly Handbook for the Running Department and Rolling Stock Repair Shops of the German Reichsbahn), 1939 (4th year)	861	621. 13 (02 (.43), 621. 138.5 (02 (.43) & 625. 26 (02 (.43)
The Fiftieth Anniversary of the Bulgarian State Railways (1888-1938)	862	385 (093) (.497.2)
X. MONTHLY BIBLIOGRAPHY OF RAILWAYS	107	...

No. 9. — SEPTEMBER 1939.

I. ENLARGED MEETING OF THE PERMANENT COMMISSION (6-8 July, 1939): Summary of Sectional Proceedings:		
Question I: Methods used to speed up passenger trains and the resulting expenditure. In particular, operating by means of railcars and the financial results obtained by this method	865	385. 114 & 656. 22
Question II: How should the problems of simplifying the working be considered in the future in the interest both of the public and of the railways?	890	656. 2
Plenary Meeting held on the 8th July, 1939: Proceedings	900	385. 114, 656. 2 & 656. 22
APPENDIX: Final summaries.		
Question I	907	...
Question II	908	...

N° 9. — SEPTEMBER 1939 (continued).

Official information issued by the Permanent Commission of the International Railway Congress Association :

Meetings held by the Permanent Commission in Brussels (6-8 July, 1939)

Appendix 1 : List of Members and their Assistants who attended the meetings

Appendix 2 : List of questions selected for the Agenda of the 14th Session

II. The production of **martensitic rails**

III. Methods of **lubrication** used on the railways of the United States, by J. RIBOUD

IV. New **4-8-4 passenger** and **2-10-4 freight locomotives** for the Atchison, Topeka and Santa Fe Railroad

V. MISCELLANEOUS INFORMATION :

1. New **five-car diesel trains** for Holland

2. Milwaukee **50-ton all-welded flat cars**

VI. MONTHLY BIBLIOGRAPHY

No. 10. — OCTOBER 1939.

I. **Welded metal bridges**. Comparison between the **German and the French standard specifications** (Case of the plate girder bridges), by H. RÉGIS

II. **Railway curves**. — Junctions. — Problems of layout. — **Junctions with transitioned turnout-curves**, by J. CHAPPELLET

III. New American **5 000-H.P. turbo-electric condensing locomotive** for the Union Pacific Railroad, by W. D. BEARCE

IV. Acoustic methods of **sounding concrete and metal structures**

V. New oxy-acetylene process for **butt-welding rails**

VI. The **motion over curves of multi-wheeled locomotives**, by Herr AVENMARG

VII. A **simplified rate classification** in Uruguay. A new scheme which provides an automatic goods classification designed to place **rail and road transport on an equality**

VIII. New **buffet-restaurant car** for York-Swindon service

IX. MISCELLANEOUS INFORMATION :

1. **Turntable extension carrier** to accommodate long-wheelbase wagons, by M. MARJOLLET

2. **Hydraulic buffer stop** at Aldgate East Station

X. **OFFICIAL INFORMATION** issued by the Permanent Commission of the International Railway Congress Association :

List of Members of the Permanent Commission (July 6th, 1939)

No. 11. — NOVEMBER 1939.

	PAGES.	NUMBERS of the decimal classification.
The bascule railway bridge over the South Beveland Canal on the Roosen- daal-Flushing line, near Vlakte, Holland, by Th. W. MUNDT	1031	624. 8 (.492)
Noteworthy trial run of an Electrotrain on the Florence-Milan line	1048	656. 222.1 (.45)
Brittleness tests. Their importance as regards the use of carbon steels, by J. MERKLEN and E. VALLOT	1050	62 (01 & 669. 1
Repeating signals in the locomotive cab by means of the « detected cro- codile », or ramp	1053	656. 254
NEW BOOKS AND PUBLICATIONS :		
The Locomotive Running Department , by J. G. B. SAMS	1057	621. 137 & 621. 138
Code de la coordination des transports ferroviaires et routiers (<i>Code of rail and road transport co-ordination</i>), France	1058	656 (.44)
MONTHLY BIBLIOGRAPHY	155	...
No. 12. — DECEMBER 1939.		
Does copper still retain its importance in locomotive construction?, by Dr. A. KARSTEN	1059	621. 133.2 & 669. 3
Centrally-controlled electric traction substations on the Paris-Le Mans line, by J. DUMAS	1065	621. 331
Investigation into lattice girders of welded steel and reinforced concrete , undergoing stresses and fatigue tests, by Dr. M. Roß	1080	62 (01
MISCELLANEOUS INFORMATION :		
Fast railcars ordered by Norwegian State Railways for service on the Oslo- Bergen line	1085	621. 431.72 (.481)
NEW BOOKS AND PUBLICATIONS :		
Die Entwicklung und der Stand der Zugbeeinflussung bei der Deutschen Reichsbahn (<i>Development and present position of automatic train control on the German State Railways</i>), by Reichsbahnrat KRAUSKOPF	1087	656. 254 (.43)
Leitfaden für den Dampflokomotivdienst (<i>Manual for the steam locomotive staff</i>), 3rd edition (1939), by L. NIEDERSTRASSER	1088	621. 137 (02
Elsners Taschen-Jahrbuch für den Reichsbahn-Kraftverkehr (<i>Elsner's annual handbook for the road and rail motor traffic of the German State Rail- ways</i>), 1939, 4th year	1088	621. 431.72 (.43) & 621. 431.73 (.43)
Urban and Suburban Railways , by Paul H. BENDTSEN	1089	388
The Oil Engine Manual , by D. S. D. WILLIAMS and J. MILLAR SMITH	1089	621. 436
Durchhänge und Zugspannungen von Freileitungen — D. Z. Kurve (<i>Sags and mechanical tensions in electric overhead lines — D. Z. curve</i>), by F. BESSER	1090	621. 34
I. MONTHLY BIBLIOGRAPHY	167	
I. Analytical tables of articles according to the decimal classification . . .	1 to 10	
I. Contents of the XXist year of the English edition	1 to VII
